About Me

Driven and detail-oriented software engineer with a strong foundation in building modern, user-focused web applications. I thrive in fast-paced environments where clean code, thoughtful design, and reliable performance matter. With real-world experience crafting full-stack solutions using popular tools like React and Node.js, I bring both technical skill and a passion for continuous improvement. At 20 years old, I combine fresh perspective with proven capability—ready to contribute, grow, and make an immediate impact on any engineering team.

🗣️ Languages

Macedonian (Native)
English (Fluent)

🎓 Education

- Classical Guitar Studies**
DMBUC - „Ilija Nikolovski - Luj“ 09/2019 - 06/2023
- Computer Science & Innovations**
Brainster Next College 10/2023 - 06/2026

💼 Professional Experience

- IT SUPPORT SPECIALIST & WEB DEVELOPER**
articbreezesystems 06/2024 - 10/2024
Built and launched an e-commerce website for selling truck AC units in the U.S. market, including design, development, and integration of payment systems.
Gained hands-on experience in web development technologies and IT support, blending creativity with technical problem-solving.
Worked closely with clients to understand business requirements and ensure the website was user-friendly and optimized for performance.
- PHP INTERN AT PABAU CLINIC SOFTWARE**
Pabau 01/2025 - 03/2025
Engineered dynamic server-side applications by crafting optimized PHP code that automates workflows, enforces business logic, and boosts overall system performance.
Designed interactive front-end components with jQuery to enhance user engagement and improve functionality across diverse platforms.
